STARRED QUESTION NO:255
ANSWERED ON:10.08.2005
COMBATING COMMUNICABLE DISEASES
Dome Dr. Ram Chandra;Seth Shri Lakshman Chandra

**Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:**

(a) whether the number of patients suffering from communicable diseases is growing in the country;

(b) if so, the reasons therefor;

(c) the number of cases of meningitis, hepatitis, cholera, chicken pox, dengue, measles, typhoid and gastroenteritis reported in 2005 till date in Delhi, Mumbai, Kolkata and Chennai, separately and also State-wise; and

(d) the steps taken/being taken by the Government to control the same?

## Answer

THE MINISTER OF HEALTH AND FAMILY WELFARE (DR. ANBUMANI RAMADOSS)

(a)to(d): A statement is laid on the Table of the House.

STATEMENT REFERRED TO IN REPLY TO LOK SABHA STARRED QUESTION NO. 255 FOR 10TH AUGUST, 2005

The incidence of some communicable diseases like enteric fever, viral hepatitis, measles, acute respiratory infection, pneumonia, gonococcal infections, diphtheria, meningococcal meningitis and syphilis is generally on the increase in the country as a whole for the following reasons:

- Rapid urbanization and inadequate infrastructure in urban areas
- Domestic water storage practices
- Industrialization and irrigation have resulted in movement of labour population and increased mosquitogenetic conditions
- Insufficient water supply and inadequate water quality monitoring
- Poor food hygiene and quality monitoring
- Poor personal hygiene
- Declining immunization coverage
- Overcrowding and insanitary environmental conditions
- Better surveillance systems to detect more number of cases

The number of cases of meningitis, hepatitis, cholera, dengue, measles, Enteric Fever (Typhoid) and gastroenteritis reported in 2005 State-wise is at Annexure.

Health is primarily a State subject and provision of medical relief for communicable diseases through primary and community health centres is looked after by the State Governments. Communicable diseases are linked to maintenance of environmental hygiene, sanitation, consumption of safe and good drinking water. The preventive measures taken by local health authorities include provision of safe drinking water, improvement of personal and community hygiene, safe disposal of human excreta, undertaking appropriate health education, surveillance and monitoring, distribution of chlorine tablets and ORS packets etc.

The Government of India supplements the efforts of the State Governments/Union Territories through various National Health Programmes. Funds are also provided under the Accelerated Rural Water Supply Programme, Accelerated Urban Water supply Programme, Total Sanitation Campaign, School Sanitation and Hygiene Education and low cost sanitation scheme for tackling quality related problems in respect of drinking water supply and sanitation. National Institute of Communicable Diseases provides technical support to the State Governments and undertakes surveillance, early detection and prevention and control of outbreaks of communicable diseases. The Government of India has launched an Integrated Disease Surveillance Programme in November, 2004, to further strengthen identification of outbreaks of various water borne and vector borne diseases like Meningitis, Hepatitis, Cholera, Typhoid, Measles, Malaria, Gastroenteritis etc. so that early intervention could be made and occurrence, disability and death due to such communicable diseases could be reduced.
